KROGH, J., Mutschowck, J., and FRIZ, K.
HONEYCOMB GRIDS FOR KLYSTRONS (Wabengma-
ter für Klystrons). [1963] [22]p. (foreign text included).
Order from SLA \$2.60 63-18083

Trans. of Frequenz (West Germany) 1963, v. 16,
no. 3, p. 69-76.

DESCRIPTORS: *Reflex klystrons, *Electron tube parts,
Honeycomb cores, Copper, Life expectancy.

The development of a reflex klystron for wideband
transmission at frequencies around 11 Gc led to the
problem how to make grids capable of carrying particu-
larly high loads. Honeycomb grids of copper qualify
particularly well for this purpose because of their high
optical transparency. A manufacturing method is de-
scribed which avoids the irregularities appearing in the
boundary zones of the honeycomb grids known so far.

Abstract: The process is for the preparation of primary alkyl bromides from alkenes, ethylenes, hydrocarbons, and other compounds.

The process is for the preparation of primary alkyl bromides from alkenes, ethylenes, hydrocarbons, and other compounds. The process is characterized by the fact that as feedstocks primary carbon mixtures are used as initial substances which were produced by the thermal
